WHAT IS CLAIMED IS:

A pharmaceutical composition for preventing and/or treating peptic ulcer, comprising:

- (i) an effective amount of American ginseng and/or the extract thereof; and
- (ii) a physiologically $\property \property \$
- 2. The pharmaceutical composition according to claim 1, wherein said American ginseng is Panax quinquefolium L..
- 3. The pharmaceutical composition according to claim 1, wherein said American ginseng extract is extracted with a solvent having a polarity higher than 0.88.
- 4. The pharmaceutical composition according to claim 3, wherein said American ginseng extract is extracted with 10% ~ 80% ethanol aqueous solution.
- 5. The pharmaceutical composition according to claim 3, wherein said American ginseng extract is extracted with water.
 - 6. The pharmaceutical composition according to claim 1, wherein said American ginseng extract is extracted with water or 10% ~ 80% ethanol aqueous solution, centrifuged, and filtered through an altrafiltration membrane with molecular weight cut off 1,000 to give a retentate containing substances with molecular weight greater than

- 7 1,000 dalton, and the retentate being concentrated to give
- 8 an extract I.
- 7. The pharmaceutical composition according to claim 6, 1 wherein sai $\operatorname{\lambda}$ American ginseng extract is extracted with water or 10% \backslash 80% ethanol aqueous solution, centrifuged, and filtered t h rough an ultrafiltration membrane with 4 5 molecular weight cut off 1,000 to give a filtrate containing substances with η olecular weight less than 1,000 dalton, the 6 filtrate being concentrated to dry, added ethanol solution 7 to dissolve said s ϕ bstances, filtered said ethanol solution 8 to obtain a soluble \backslash portion, added said soluble portion into . 9 said extract I as claimed in claim 6 to obtain a mixture, 10 and concentrated said γ mixture to give the extract II. 11
 - 8. The pharmaceutical composition according to claim 1, wherein said American ginseng extract is extracted with water or 10% ~ 80% ethanol aqueous solution, centrifuged, filtered through an ultrafiltration membrane with molecular weight cut off 3,000 to give a retentate containing substances with molecular weight greater than 3,000 dalton, and the retentate being concentrated to give an extract III.
- 9. The pharmaceutical composition according to claim 8, wherein said American ginseng extract is extracted with
- 3 water or 10% ~ 80% ethanol aqueous solution, centrifuged,
- 4 filtered through an ultrafiltration membrane with molecular
- 5 weight cut off 3,000 to give a filtrate containing
- 6 substances with molecular weight less than 3,000 dalton, the
- 7 filtrate being loaded onto a reverse phase column, eluted
- 8 with water, followed by ethanol solution and collected the

- 9 eluate, and then the 95% ethanol is combined with said 10 extract III in claim 8 and concentrated to give extract IV.
- 1 10. The pharmaceutical composition according to claim 1, 2 wherein said American ginseng extract is extracted with 30% 3 ~ 90% ethanol approus solution followed by filtration and 4 concentration to give extract V.
- 11. The pharmaceutical composition according to claim 1, 2, wherein said peptic ulcer is a gastric ulcer or duodenal 3 ulcer.
- 1 12. A process of preparing an American ginseng extract 2 for preventing and/or treating peptic ulcers, comprising the 3 steps of:
 - (a) extracting American ginseng with a solvent with a polarity higher than 0.88 to obtain an extract;
 - (b) filtering said extract to obtain a filtrate; and
 - (c) centrifuging said filtrate and collecting the supernatant to give the total extract.
- 1 13. The process according to claim 12, further
 2 comprising the step of ultrafiltrating said total extract to
 3 give a retentate and a filtrate.
- 14. The process according to claim 13, wherein said ultrafiltrating is a step in which said total extract is:
 3 filtered by means of an ultrafiltration membrane with molecular weight cut off 1,000 or 3,000 to remove smaller molecules.

- 1 15. The process according to claim 12, further 2 comprising the step of dialyzing said total extract.
- 1 16. The process according to claim 15, wherein said 2 dialyzing is a step in which said total extract is dialyzed 3 by means of a dialysis membrane with molecular weight cut 4 off 500 to remove smaller molecules.
- 17. The process according to claim 13, further
 comprising a precipitating step in which said filtrate is
 concentrated to dry and then dissolved with 50% ~ 100%
 ethanol to obtain the soluble portion.
- 18. The process according to claim 13, further comprising the step of performing reverse phase chromatography of said filtrate.
- 19. The process according to claim 18, wherein said reverse phase chromatography is performing with a reverse phase polyaromatic resin column.
- 20. The process according to claim 12, wherein said
 American ginseng extract is extracted with 10% ~ 80% ethanol
 aqueous solution.
- 21. The process according to claim 12, wherein said
 American ginseng extract is extracted with water.
- 1 27. A method for preventing and/or treating a patient 2 suffering from peptic ulcer, comprising administrating an

- 3 effective amount of American ginseng and/or the extracts
- 4 thereof to said patient.
